## ***DETAILED ACTION***

### ***Status of Claims***

Applicant's pre-appeal brief request dated 4/19/2010 has been received, and claims 1-12, 14, and 35-46 are pending in this application.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

**Claims 1-12, 14, and 35-46** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, all of the claims inherit the language from base claims 1 and 35 "...ambient condition *other than time*...". The negative limitation 'other than time' is not explicitly described in the specification or original claims. Generally, negative limitations which are positively claimed must have explicit support in the specification or original claims. Correction of this issue is required. Examiner believes this to be the only issue remaining preventing allowance.

### ***Response to Arguments***

Applicant's remarks in the pre-appeal brief have been considered, and applicant's argument pertaining to the prior arts failure to teach of a composite sleep metric that is a function of the sensed physiological and

non-physiological information is persuasive. With the exception of the new matter issue described above, the case is believed to be in condition for allowance.
